

Commercial Buildings

PROJECT: Machine Renovation Technologies

LOCATION: Wrightstown, WI

"Tri City Glass & Door has all the critical skills I look for in a vendor: they provide cost-effective solutions, they understand the importance of the schedule, and they do whatever it takes to get the job done."

*– John Meulemans, Project Manager

The Right Product. The Right Way.

CHALLENGE

Complex, multiple framing systems and custom products were specified in order to add visual interest to the building. In addition, this project had an extremely tight construction schedule.

UNIQUE ISSUES

Established design by the architect, requiring:

- ▲ Significant number of custom windows and doors
- ▲ Fulfilling the design needs exactly, fabricating most of those products on-site
- ▲ Maximum natural lighting
- ▲ Windows with unusual sizes and angles
- ▲ 18' X 24' skylight

SOLUTION

Tri City completed all the custom windows and doors within the timeframe, calculating their exact sizes and shapes to ensure a precise fit and lasting performance. The massive skylight was assembled on the ground, and required our expert glaziers to use a special crane for installation. This unique feature added an abundance of natural light to the interior. **Tri City Glass & Door was awarded the "Project of Distinction Award" by Associated Builders and Contractors of Wisconsin in 2001 for their work on the Machine Renovation Technologies building.**

PRODUCTS USED

- ▲ Glass: Bronze-tinted and insulated low-e storefront windows and glass
- ▲ Framing: Bronze anodized, aluminum entrance door and window frames
- ▲ Doors: Gray painted hollow-metal exterior service doors
