

PROJECT: Clintonville High School
LOCATION: Clintonville, WI

"I'd recommend Tri City Glass & Door because of the quality of work they do and the quality of the product they install. Their employees are very accommodating and made the project go smoothly. When I called about some warranty work, they responded quickly and did the work very willingly."

*— Steve Reinke, Administrator of Buildings & Grounds
Clintonville Public School*

Schools | Clintonville High School

CHALLENGE

This new high school project – like most school projects today – had a very tight schedule and strict deadline. A significant number of windows, as well as a unique pool enclosure, were part of this project.

UNIQUE ISSUES

- ▲ Radius glass wall specifications
- ▲ Energy efficiency
- ▲ Maximize natural lighting
- ▲ Moisture control within indoor pool

SOLUTION

Tri City Glass & Door's experience working with the fast turnaround of school construction was key to ensuring that all the windows and doors went in flawlessly. Deadlines throughout the project were successfully met. An abundance of light was achieved through the use of glass wall panels and large windows, which helped to create a bright, comfortable atmosphere very conducive to learning. The unique pool enclosure was installed using specialty glass made for the moist conditions of a pool area.

PRODUCTS USED

- ▲ Glass: Evergreen TIR low-e #3 glass windows
- ▲ Framing: Clear anodized aluminum entrances, curtain wall frames, and storefront frames
- ▲ Pool Area: Clear segmented Vision Wall glass from Canada Ivy green anodized exterior pool enclosure frames

MORE SCHOOL PROJECTS

Tri City Glass & Door has worked on schools throughout the state and neighboring states. Some examples include:

- ▲ Appleton North High School, Appleton
- ▲ Brillion High School, Brillion
- ▲ Pecatonica High School, Pecatonica, IL*
- ▲ Greenville Elementary School, Greenville
- ▲ St. Thomas More, Appleton
